Programming Experience/Projects

Spotify Jukebox. In Progress

Role: GUI Design, Spotify Integration, SCRUM Master, Developer

Location Based Collaborative Playlist Application for Android Devices.

Allows users with a valid Spotify account to create a jukebox, play music from their device, while allowing other users, who are nearby, to subscribe to the jukebox and add songs to a song queue which is to be played from the creator's device.

Secure Messaging Application. Completed

Role: Development, Database Maintenance, SCRUM Master

Encryption Heavy Messaging Application for Android Devices. Allows users to send messages to other people with accounts registered by a System Admin with multiple encryption choices and timed self-deletion.

Library Inventory Application. Completed

Role: Solo Developer

Inventory System for Library that handles multiple sessions and user's while storing information in a remote database using phpMyAdmin and MySQL. Allowed for the management of inventory at a library while giving different user's permissions depending on their role at the library and handling multiple edits at once.

Avenida San Bernardo Website. In Progress

Role: Web Developer

Volunteer work for a non-profit association of local businesses in Laredo, TX. Creating a website for the organization with information on events and businesses. Integrated with an open-source Content Management System at the client's request.

Work Experience

Sales Associate

PetSmart, San Antonio, Tx. May 2016 - October 2016

Interacted with customers, dealt with complaints and returns, organized inventory, and cared for animals in the store.

Receptionist

BH Transportation, Laredo, Tx. May 2012 - July 2012, May 2013 - July 2013

Handled phone calls with clients, office mail, delivered payments, helped with stocking the warehouse, and simple IT problem solving.
